

Decisions for health curriculum were made during the 2007-2008 school year. The K-5 health curriculum team consisted of classroom teachers and PE teachers. Starting the 2008-2009 school year, the following health objectives have been designated to be taught by the classroom teacher in science. Please refer to the Missouri Department of Elementary and Secondary Education Health Education Grade Level Expectations to view the additional GLE's that will be taught by health instructors.

Kindergarten	All health objectives taught by the PE instructor during PE
